Active Shooter & Security Incident Safety Training

InDev’s proprietary active shooter and violent encounter response training. ***ASSIST*** goes beyond generic active shooter videos such as “*Run-Hide-Fight*” to provide an understanding of real-world response issues.

ASSIST deals with the two major elements of an active shooter event; first, the initiation of violence and internal reactions, and second, the arrival of external first responders.

ASSIST can be presented as a half-day overview, or a full day training event which offers additional exercises, interaction, and drills.

ASSIST helps you understand:

- what's happening,*
- what to do, and*
- when to do it.*

ASSIST was developed for electric co-ops and public power systems.

A recent FBI study found 80% of active shooter events occur at work².

ASSIST Training:

- Fulfills OSHA workplace violence training recommendations³
- Satisfies all federal annual counterterrorism training requirements
- Instills confidence and reduces fear and anxiety
- Introduces skills needed for surviving the *violent first minutes*
